

BRIEF INTRODUCTION OF KINDER BUBBLE INTERNATIONAL SCHOOL

At Kinder Bubble International School (KBIS), we believe that every child should enjoy their education and be happy, healthy and safe at school.

Our school is one-step in a child's journey of lifelong learning and will always be a caring place where children and adults make valuable contributions and are inspired to be creative, think for themselves and feel confident to meet new challenges.

Our Motto is: **Ducem Scientia** (*The knowledge leader*) and our slogan –

ADIKANFOO (*The pace setters*) niched from our most common traditional language – Asante Twi.

We pride ourselves in our cultural heritage and this we are ready to impart to our students right from their early years.

Our **VISION** is to establish a school with focus on producing future "innovators" whose educational experience is shaped by systematic moulding and blending of character and academics for life-long outcomes that prepare them for future challenges: to create a "crucible" for learning

&

The **MISSION** is to offer holistic, all-rounded early childhood education, to lay the foundation for knowledge seekers, independent-thinkers, self-confident, well-rounded, and God-fearing character.

CURRICULUM AND BILINGUAL STUDIES We follow both the *French Ministry of Education Syllabus* and the *Cambridge International Curriculum*.

As a Bilingual Institution, our mode of teaching makes a balance of 50% English and 50% French with two teachers (Anglophone and Francophone) to a standard small class size.

Bilingual Education in the Classroom

Bilingualism is the ability to communicate in two different languages. Languages are learned most readily during the toddler and preschool years and, to a lesser extent, during elementary school. Therefore, children receiving bilingual education easily acquire both languages whereas

Bilingual education is the process of teaching students using two languages.

Teachers usually teach students in their *native language* in conjunction with a second language utilizing differing levels of the native and second language depending on the requirements specified in lesson plans and teaching models.

In preparing our future leaders for brighter days ahead, we deem it fit to include **French as a second language (FSL)** since it is the most widely taught second language after English with over 200 million people in the world who understand, speak, read or write .

French being an official language of 29 countries and spoken in over 43 countries in the world, we focus on preparing our future leaders to the international standards hence our choice of Bilingualism **English and French**.

EXTRA CURRICULA ACTIVITIES

“By depriving children of opportunities to play on their own, away from direct adult supervision and control, we are depriving them of opportunities to learn how to take control of their own lives. We may think we are protecting them, but in fact, we are diminishing their joy, diminishing their sense of self-control,

preventing them from discovering and exploring the endeavours they would most love, and increasing the odds that they will suffer from anxiety, depression, and other disorders”. –

Dr. Peter Gray

Extracurricular activities are any activities scheduled outside of a child's school day. Typically, they refer to activities that are regularly scheduled through an organization and include, but aren't

limited to music lessons, organized sports (baseball, tennis, hockey, football) other athletic activities (yoga, taekwondo)

Through play, not only do children develop a greater understanding of themselves, but they also feel like they have more control over their worlds.

At KBIS, we offer the following extra-curricular activities at a fee.

- 1) Taekwondo
- 2) Ballet
- 3) Football
- 4) Cadet
- 5) Arts Club

Parents are advised to contact the school Administration for the price list and sign- up sheet for their wards.

FEEDING

At Kinder Bubble, We provide a variety of well-balanced meals comprising the necessary portions of protein, carbohydrate, fresh fruits and vegetables.

Our menus are prepared on the expert advice of nutritionists, and cooked in our kitchen by our chef and his team. We also ensure that children are served with low sugar foods.

Proper washing and disinfecting procedures are followed for cleaning tables used for eating, food preparation surfaces and food equipment before and after food use.

Staff always wash their hands after wiping tables and before serving food. Child hand-washing before meals consists of washing hands with soap and water, drying hands with a paper towel and going directly to a table.

NB: *Families' dietary restrictions due to religious beliefs, personal beliefs, cultural customs and health issues are respected by the school. Information regarding food allergies would be documented in writing for each affected child and be readily available to all staff involved with the children's meals and snacks. This includes kitchen personnel and substitute instructional staff.*

Every child is entitled to breakfast, lunch and snacks

EDUCATIONAL TRIPS

Educational field trips are significant for students in several ways.

These trips offer diverse learning opportunities, improve health and allows children to get an authentic experience that is essential to children's self-confidence.

A field trip associated with outdoor activities gives children many opportunities to use their imaginations, help motivate flexibility and the ability to address problems.

To be more precise, children can gain a better perspective of the world around them by going on field trips simply because they are experienced in direct contact with new stations and observe

different things through their eyes.

These educational tours are a great way of putting their knowledge as well as experiences to test.

For each academic term, our educational trips are organised based on our theme and lesson plans for the term.

We plan, organize a meeting with parents and pay attention to safety.

Our fun educational trips includes visit to the zoo, museum, farm etc.

Clearly, learning and enjoyment always make a great combination!
